WINE CAVE TECHNOLOGY™
Carefully tailored to mimic the ideal environment of historic wine caves, our exclusive design minimizes temperature fluctuations, reduces vibration, limits light passing through, and locks in humidity.

PRECISE PRESERVATION
Ingenious features like an inverter linear compressor and metal interior help to keep your collection cool while maintaining the lowest temperature fluctuation among leading brands* and vibration minimized to less than 2 gal (cm/s²).

LIGHT AND HUMIDITY CONTROL
Dark-tinted, triple pane glass protects wine from damaging UV light while humidity control boosts humidity to optimum levels, helping to preserve quality and taste.

INDEPENDENT TEMPERATURE ZONES
Three Independent temperature zones keep sparkling, white, and red wines at the right temperature to bring out the very best taste.

TOUCH DISPLAY LIGHTING
Showcase an entire collection with a touch of the door. LED lights are activated by gently tapping the door or with the mobile app. Choose from four display settings including, Presentation, Upper, Lower, and All.

TRUEFIT™ INTEGRATED DESIGN
Every integrated column features an intelligent, symmetrical design that allows for flush installation, along with easy door reversal.

ECO FRIENDLY
Engineered to reduce environmental impact with HFC / HCFC free refrigerant, insulation and recyclable materials, while using just 270 kWh/yr — the lowest energy consumption in the industry.*

*When compared to leading brand wine refrigerators of similar size and capacity as of Feb. 2019.

24-INCH INTEGRATED COLUMN
WINE REFRIGERATOR

CUTOUT DIMENSIONS – FLUSH INSTALLATION
SINGLE COLUMN

Notes
Wine refrigerator can be installed flush with 3/4" custom panel or optional stainless steel panel kit.

With a 25" (635 mm) cutout depth, the front face of the wine refrigerator fits flush with 25" (635 mm) depth adjacent cabinets.

Electrical
A 115V, 60Hz., 15 or 20 amp power supply is required. An individual properly grounded branch circuit or circuit breaker is recommended. Install a properly grounded 3-prong electrical receptacle recessed into the back wall. Electrical must be located on rear wall as shown.

Note: GFI (ground fault interrupter) is not recommended.

* A minimum 4" (102 mm) finished return that matches the cabinet exterior is recommended on all sides and the top of the cutout opening. The shaded area will be visible after installation.

INSTALLATION CLEARANCES – FLUSH INSTALLATION
TOP VIEW

Notes
Door Swing Clearances – The installation must allow for clearances to adjacent walls or cabinets. This wine refrigerator is equipped with a 2-position door stop. The factory-set 115° door swing can be adjusted to 90° if clearance to adjacent cabinets or walls is restricted.

Door Handle Clearances – The Door Handle depth must be added to the dimension noted to determine the total clearances required from adjacent cabinets or walls. This clearance will vary depending on the custom handle used. When using the Stainless Steel Door Panel Kit w/Handle or the Brushed Aluminum Handle (optional accessories), the door handle clearance with door open 115° is 14" (356 mm).

CUSTOM PANEL DIMENSIONS

Notes
These units are designed to be customized with decorative panels. Field-installed custom door panels or an optional Stainless Steel Panel Kit is required.

For Custom Panels: Use templates provided with units to pre-drill holes for mounting panel brackets (provided with unit). Adjustment screws and instructions also provided with units.

Maximum Total Door Panel Weights:
24-Inch Integrated Column – 22 lbs.
18-Inch Integrated Column – 21 lbs.

Design Tips
4” (102 mm) will be visible on the interior sides of the furniture return. It is recommended that both sides of each cutout panel be finished to match the cabinet exterior.

If using custom panels, a custom toe kick is required. The bottom of case is unfinished.

Door Handles: Handles are not included with the units. Custom handles are required for installation. Brushed Aluminum Handles are available as an optional accessory.

OPTIONAL ACCESSORIES
